# SPLASH BACK WALL GUARD

ANTI-MILDEW | ZERO MOLD | NO WATER SPLASHBACK  
NO BACTERIAL GROWTH | NO WET FLOORS | EASY CLEAN

**TOUCH DRY IN SECONDS**

INSTANTLY ABSORBS & EVAPORATES WATER

ANTI-MILDEW | ZERO MOLD | NO WATER SPLASHBACK  
NO BACTERIAL GROWTH | NO WET FLOORS | EASY CLEAN

Hand dryers are eco-friendly and eliminate the need for paper towels in washrooms. However, they can generate residual water spray, which may cause damage to walls and floors.

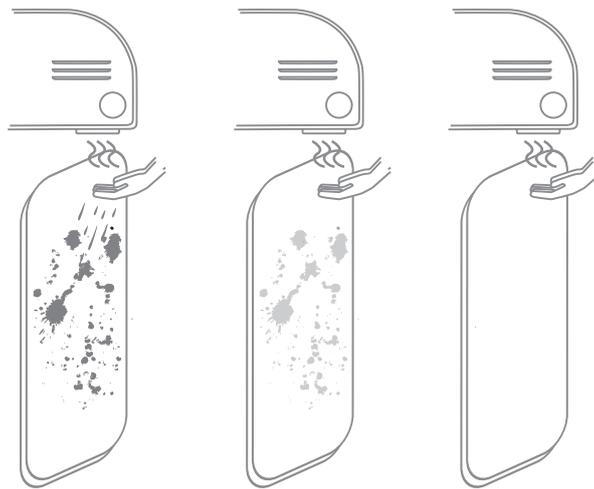

The evapor8 wall guard solves this problem.

**LASTS A LIFETIME!**  
with our replacement promise

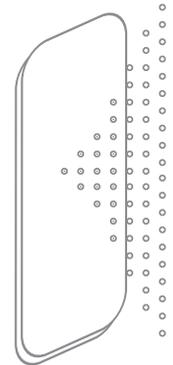

**STAINLESS STEEL OR PLASTIC WALL GUARD**

Water drips down the wall plate and onto the floor

**evapor8™ WALL GUARD**

Dries Instantly. Absorbs all the water into the complex structure. Continuous airflow dries it out.

**ANTI-MICROBIAL**

When moisture hits the surface of our unique evapor8™ technology, the material traps, dries out & kills bacteria and parasites.

## HELPING TO CREATE A CLEANER, SAFER PUBLIC WASHROOM

The evapor8 is the ideal solution for protecting walls from water splash back caused by “hands under” dryers and enhancing hygiene in a washroom environment. Our guard is made from a blend of naturally occurring rock sediment that rapidly absorbs and evaporates water, leaving it dry to the touch within seconds. It prevents water from dripping down to the floor and leaving unsightly watermarks. The Evapor8 guard is durable and long-lasting, and guaranteed for life with our replacement promise. This product promotes circularity rather than contributing to landfills, so buy it once and benefit forever!

Patent pending: Through a process of research with the two Sheffield Universities, engaging material science students and the professional design consultancy arm we have identified a composite material that works perfectly to absorb and filter the water sprayed off the hands, leaving clean and dry floors and walls.
