

MFC Laminate Lockers

Changing Room Locker Colour Choices

Where appearance counts and lockers need to withstand heavy use, our range of Melamine Faced Chipboard (MFC) door lockers are ideal. The thick doors, self-closing hinges and sturdy composition of these lockers allow them to withstand a level of punishment in lower traffic environments such as offices, universities, leisure facilities and many more.

MFC, is a laminate with layers of decorative paper and a chipboard core, all filled with strong resin. At 18mm thick, MFC provide a sturdy and budget friendly solution to many changing area situations, however it is important to note it is not suitable for wet areas.

The MFC doors offer a fantastic way to match lockers with other washroom or changing room fittings such as changing and toilet cubicles as well as benches and vanity units. With a selection of 14 standard colours, designers are able to have freedom in creating visually impressive, yet functional solutions.
