

Low level/back to wall Doc M pan

Product Detail:

This Doc M pan is suitable for a low level and a back to wall toilet. The Pan, Cistern and internal fittings are available as separate parts and accessories, as a full ware set (including the pan, cistern, fittings, seat and flush) or as a doc M pack which includes a back spacer for the back to wall option.

A low-level toilet requires a universal cistern and is generally used in older building due to the historic plumbing and water pipes.

The back to wall toilet pan is becoming increasingly popular in new builds and full refurbishments as the cistern is concealed within a back spacer or can be hidden within the wall giving the washroom a contemporary feel. Smaller rooms can easily be adapted for accessibility purposes within the home or public building using the back to wall pan for its space saving advantage. The useful back spacer, that can be purchased separately from NYMAS can also double up as a back rest and colostomy bag.

These pans comply with doc M as they have a projection of 750mm although a back to wall toilet pan requires a back spacer to be compliant.

When used with our 260005 toilet seat, the toilet unit is 480mm high which makes transferring from a wheel chair to the toilet a much easier task allowing a steady side transfer.

This NymaPRO low level or back to wall pan has a boxed rim which is ideal for domestic bathrooms as well as hotels. A boxed rim allows the water to flow in a controlled manner around the rim before flowing through the holes into the pan. This makes cleaning easier and therefore a hygienic option as well as being quieter than other toilets.

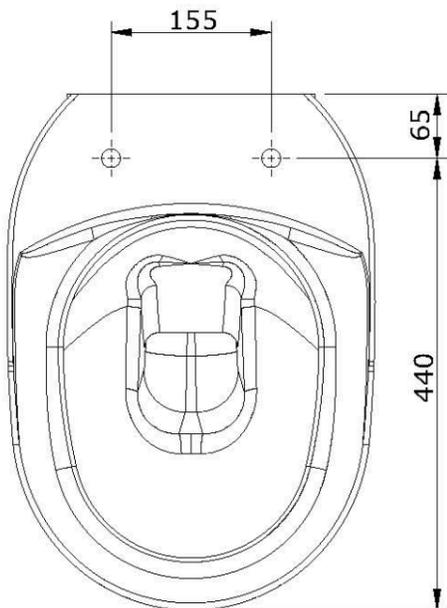

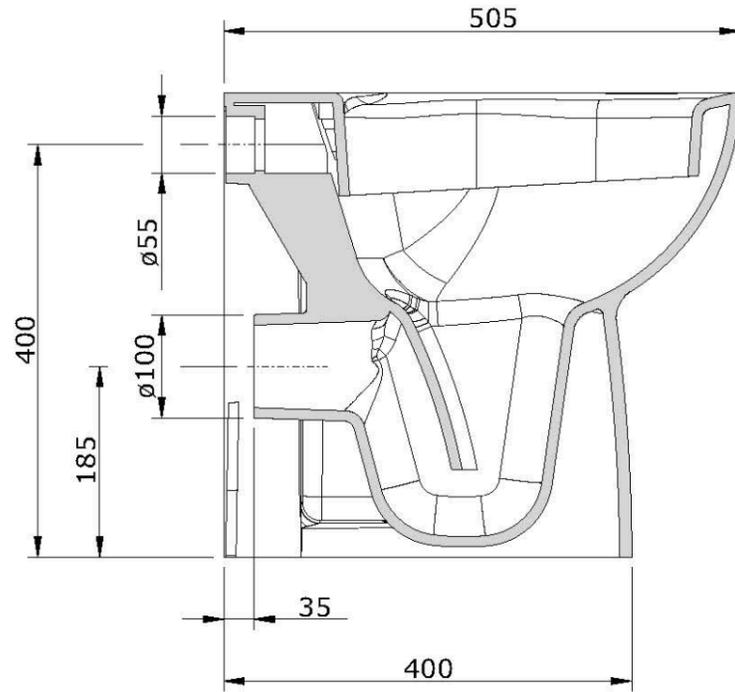

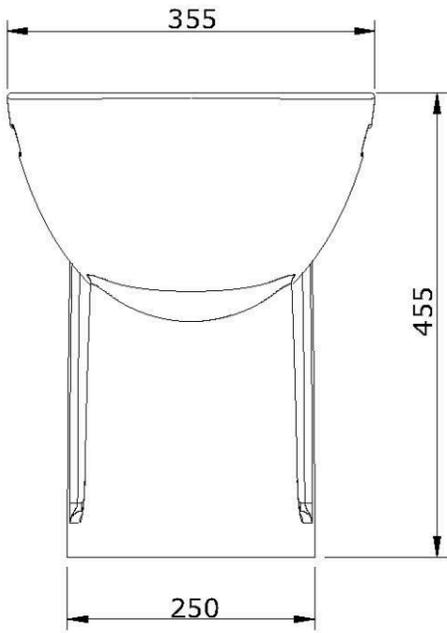

Reasons to buy

- Made from Vitreous China
- 750mm projection to satisfy Doc M regulations (when spacer is used)
- Pan only
- Low level and back to wall pan
- Box rim
- Spacer sold separately
