

DB I800

DOLPHIN BLUE PIEZO TOUCH FOOT WASH

- › Existent products for foot wash are usually mechanically operated metering taps that have an unstable water discharge over time and require frequent maintenance. In addition, they are difficult to operate by children and the elderly
- › Dolphin's new self closing foot wash control overcomes these issues by providing an accurate discharge controlled electronically
- › Vandal resistant for outdoors operated by touch
- › Saves water; improves hygiene
- › Barrier free
- › The default flow time is adjustable on site if desired
- › The unique On/Off function allows the users to shut off the water flow before the complete cycle ends, increasing water conservation
- › DB I800 can be supplied with an optional automatic hygiene flush every 24 hours
- › When a user touches the designated area on the Piezo cap, a flow cycle of 8 seconds will be completed. If the user does not need more water; they can touch the designated area to stop the water flow before the default time has passed
- › Robust solid brass construction with durable polished chrome plating suitable for external use and even in corrosive atmospheres such as swimming pools and beaches
- › Built in filter
- › Silicone nozzles for easy cleaning
- › Maximises hygiene and saves water
- › Flow restricted to 6.7 litres per minute
- › Internal battery for ease of servicing
