

# SGL Laminate Lockers

## Changing Room Locker Colour Choices

---

Where appearance counts and lockers need to withstand heavy use, our range of solid grade laminate (SGL) door lockers are ideal. The water proof doors, self-closing hinges and sturdy composition of these lockers allow the surface to withstand a great deal of punishment in demanding environments such as schools, universities, leisure facilities and many more.

SGL, or solid grade laminate is a material that's completely impervious to water, so will never swell or weaken from ingress water. With layers of paper and strong resin, and at only 10mm thickness, SGL locker doors are the best in the industry in terms of durability and performance.

Greenlam is a leading innovator and manufacturer of laminate solutions. Their collection of 23 locker decors allows designers to have freedom in creating visually impressive, yet functional solutions.

---
