

Steel Locker Stands

Changing Room Locker Stand and Bench Colour Choices

In situations where it is necessary for staff to regularly clean under lockers to prevent the build up of dirt and debris, a locker stand is the ideal solution. Our Steel locker stands raise the height of the locker by 150mm, allowing cleaning under the locker, as well as ease access to the bottom locker. In room that do not have the space to accommodate stand-alone benches, a wooden bench can be added attached to the locker stand.

All colours also contain bioshell anti-bacterial coating effective against COVID, making these locker stands ideal for use with out metal lockers in dry environments like hospitals, schools and offices.

Made from high quality painted steel, these stands have inset back legs to avoid obstacles, such as pipes and skirting boards, and allow the lockers to fit flush against the wall., and have adjustable feet to counteract uneven floors.

Locker Body Colours

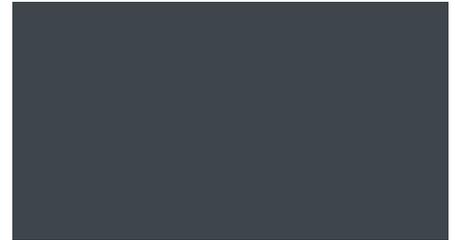

A selection of steel locker stand colours, for use with the dry area steel lockers.

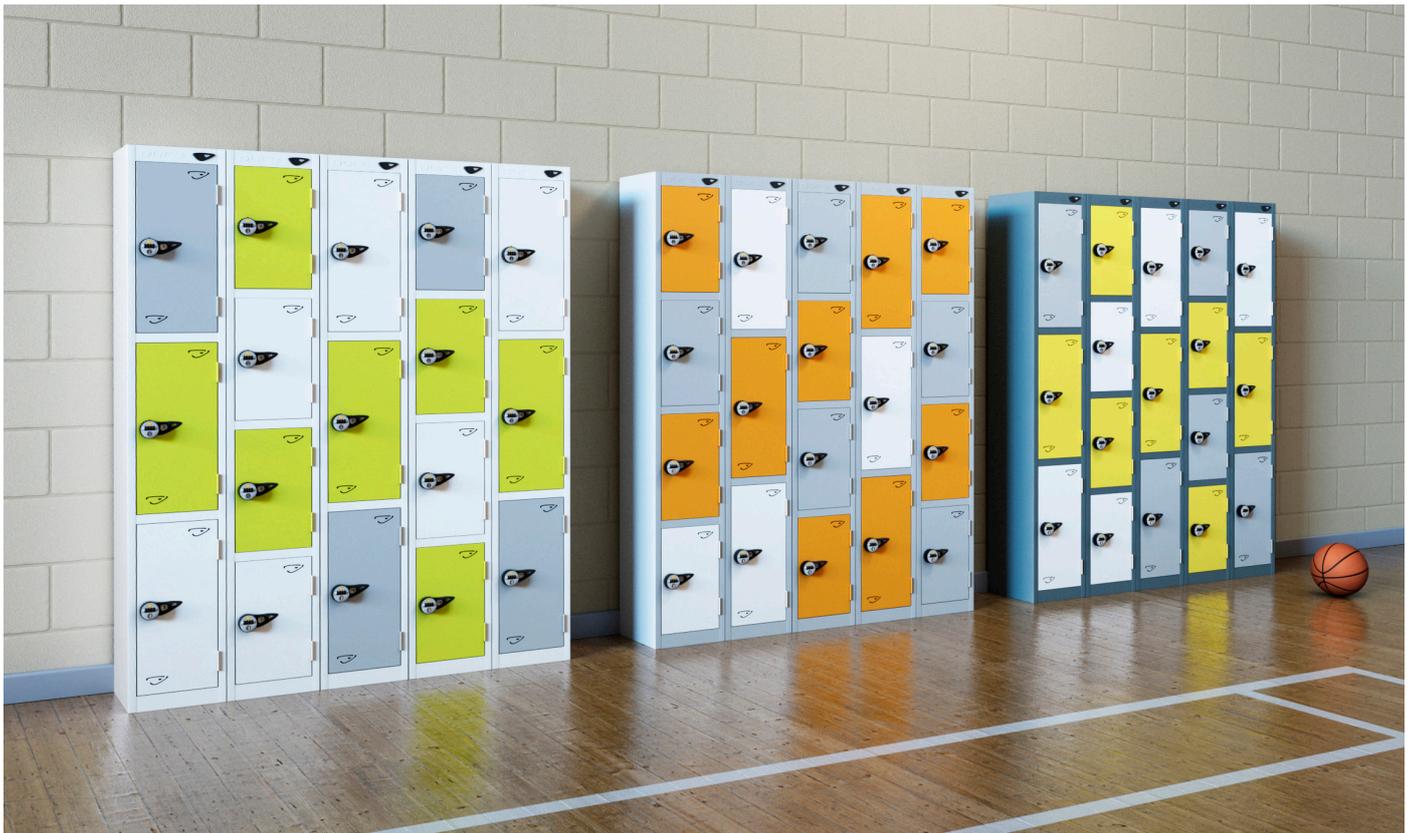

Arctic White
RAL: 9016

Pearl Silver
RAL: 9006
